

## Delivery Services

**Top Line Rental** is proud of the rental equipment and equipment delivery services we offer to Oil& Gas, Mining, General Contractor / Residential customers. Our rental store was built and designed to meet the needs of our most valuable asset which is our customers.

We specialize in JLG man-lifts, Tele-handlers, Kubota Agriculture equipment and Kubota Skid Steer units. We realize every customer does not own a vehicle or trailer capable of hauling these units. For that reason we offer a complete line of Performance Trailers to assist in meeting our customer's equipment needs.

Our Performance Trailers are equipped with safety features such as dual axle brakes, HD couplers, and HD tie downs. All units are secured by our trained staff to ensure proper tie down prior to leaving our rental facility. The specifically designed trailers are available for rent or purchase. We carry Cargo Trailers, Car Haulers, Utility Trailers, Dump Trailers, and Gooseneck units all at competitive prices. If a customer is interested in purchasing a trailer we would be happy to custom design a unit to meet their individual needs.

For our larger equipment we have a Tractor / Trailer unit in order to deliver to the customer's job site. Our trained CDL operators will be glad to assist you placing these production units where needed at your location and will pick them up when called upon.

We know how busy most customers are during the week and are more than happy to deliver any rental unit no matter how large or small for them. Just let our staff know the time, date, location and your equipment will be ready when you are. Our delivery rates are available upon request.
